

The collected data are in three files:

- 1) **women**: general information on the women recorded at their first entry into the study
- 2) **cycle1**: with information on each cycle for cycles of length up to 50 days
- 3) **cycle2**: as for **cycle1** but for cycles of length above 50 days (maximum length 169 days)

The following files are included:

- var_cycle1.pdf: with the description of the structure of the records of cycle1
- cycle1.csv: data on cycles 1 in csv format
- cycle1.Rdata: data on cycles 1 in R format
- cycle1.sas7bdat: data on cycles 1 in SAS format

- var_cycle2.pdf: with the description of the structure of the records of cycle2
- cycle2.csv: data on cycles 2 in csv format
- cycle2.Rdata: data on cycles 2 in R format
- cycle2.sas7bdat: data on cycles 2 in SAS format

- var_women.pdf: with the description of the records of women
- women.csv: data on women in csv format
- women.Rdata: data on women in R format
- women.sas7bdat: data on women in SAS format

There are also the following files:

- var_merge_ord.pdf: with the description of the records of merge_ord
- merge_ord.csv: in csv format file merge of “women”, “cycle1” and “cycle2”, ordered according to the code of the woman, the number of the series and the number of the cycle
- merge_ord.Rdata: in R format file merge of “women”, “cycle1” and “cycle2”, ordered according to the code of the woman, the number of the series and the number of the cycle
- merge_ord.sas7bdat: in SAS format file merge of “women”, “cycle1” and “cycle2”, ordered according to the code of the woman, the number of the series and the number of the cycle
